Attachments: Antidegradation Policy Questions 3.28.17.docx

As in my voicemail, here's an updated version of what I've found so far on the anti-deg questions. Feel free to let me know if this agenda looks okay to you and what changes you have. If you want to talk beforehand, I'm here until 4pm today and in the office tomorrow by 8:30AM. Thanks, Breean!

Subject: April 4 meeting

Hi Breean, we have our call next Tuesday, and I was wondering if you wanted to talk beforehand (or we can also do this by email). We had some preliminary ideas on agenda topics to focus on anti-deg. Here's my first attempt at a meeting agenda:

Goals:

Share our understanding of anti-degradation in the 401 cert analysis.
Develop path forward on anti-degradation.
If time allows, discuss compliance schedule.

Agenda:

Background and Introductions (5 minutes)

Anti-degradation questions (40 minutes)

1. *When is an anti-degradation analysis needed for a 401 certification in permitting?*
2. *Who is responsible for doing the anti-degradation analysis?*
3. *What does the analysis include?*
4. *For the LNFH facility, is a Tier 1 or Tier 2 analysis required?*
5. *For the LNFH facility, what is the baseline to compare current operations for anti- (1979, 2008)?*
6. *For the LNFH facility, can the 2008 anti-deg analysis be used for the 2017 401 cert? If no, can elements of it be used?*

Next Steps on Anti-degradation (10 minutes)

Next Steps Overall such as compliance schedule (5 minutes)

I was only able to spend a little time researching the questions on anti-deg from our last emails to each other. Here's what I've found so far, FYI. If I'm able to work on this more before April 4, I'll send it to you.

Thanks,
Jenny Wu
